Name of Pharmacy Student (Print):

Signature of Pharmacy Student:

Important Note: If a TB skin test cannot be performed due past positive PPD tests or BCG vaccination, please either have a chest x-ray done with results interpreted or a statement from a physician on office letterhead that you are free from TB and do not need a two step TB skin test or chest x-ray. Please be aware that a TB skin test can be administered to individuals who have had a BCG vaccination if a period of three or more years has elapsed since its administration.

Please submit the documentation about TB status by letterhead, official form, or this College of Pharmacy form by December 1 of your 3PD year.

Two-Step TB Skin Test

Please indicate whether the Two-Step TB skin test is positive or negative for exposure to TB.

Two-step TB skin test Postive Negative

Chest X-Ray

Please indicate the results of a chest x-ray with regard to a positive or negative exposure for TB infection.

Chest X-ray Postive Negative
